## SUMMARY

Software Engineer focused on Artificial Intelligence, with experience in full-stack development, machine learning, and computer vision. Currently exploring LLMs, NLP, and Generative AI. Passionate about leveraging new technologies to solve real-world problems and eager to collaborate on impactful, innovative projects with diverse teams.

## EDUCATION

<b>Umm Al-Qura University</b> <i>B.S. in Software Engineering, GPA: 3.91/4.00</i>	Makkah, Saudi Arabia <i>Expected Graduation: June 2027</i>
--	---

## EXPERIENCE

<b>Data Analyst Intern</b> <i>Uptrail</i>	Jul 2025 – Aug 2025 <i>London Area, UK (Remote)</i>
<ul style="list-style-type: none"><li>Participated in structured training, working on real-world data analysis projects, and received a (Recommendation Letter)</li><li>Utilized Python, SQL, Power BI, and Tableau to extract, visualize, and present business insights</li><li>Collaborated with a team on weekly projects, data reviews, and client presentations</li><li>Received mentorship and feedback from industry experts on data analysis best practices and governance</li></ul>	
<b>AI &amp; Robotics Engineer Intern</b> <i>Smart Methods</i>	Jun 2025 – Aug 2025 <i>Makkah, Saudi Arabia (On-site)</i>
<ul style="list-style-type: none"><li>Designed and prototyped robotic systems with 3D modeling and mechanical joint optimization</li><li>Programmed and integrated sensors, motors, and controllers using Arduino, ESP32, and embedded systems</li><li>Developed AI and computer vision solutions for robotics, including image classification and object detection</li><li>Built web-based controls and user interfaces to enhance robot interaction and user experience</li></ul>	

## PROJECTS

<b>ModelCraft</b> <i>Open-Source Repository</i>	Jul 2025 – Present
Built an open-source repository covering machine learning and deep learning architectures, from classical to modern models	

## PUBLICATIONS

<b>Saudi-Dialect-ALLaM: LoRA Fine-Tuning for Dialectal Arabic Generation</b> <i>arXiv</i>	Aug 2025
Fine-tuned ALLaM-7B-Instruct for Saudi dialect generation using a curated instruction dataset (Hijazi and Najdi)	

## TECHNICAL SKILLS

<b>Programming Languages:</b> Python, Java, SQL, HTML, CSS, JavaScript, React, Spring Boot
<b>Data Science &amp; ML:</b> Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, PyTorch, OpenCV, Jupyter Notebook
<b>Interpersonal Skills:</b> Leadership, Teamwork, Communication, Problem Solving

## CERTIFICATIONS

<b>Deep Learning Specialization</b> <i>DeepLearning.AI</i>	Jul 2025
<b>AWS AI Practitioner</b> <i>Amazon Web Services (AWS)</i>	May 2025 – May 2028
<b>Advanced Artificial Intelligence</b> <i>KAUST Academy</i>	Feb 2025
<b>McKinsey Forward Program</b> <i>McKinsey &amp; Company</i>	Dec 2024
<b>Python 3 Programming Specialization</b> <i>University of Michigan</i>	Sep 2024
